

Start 8-ZipFM.exe: → Asks user to install 8-ZipShellExtension.dll into Registry

The 8-ZipShellExtension.dll must register in HKEY_LOCAL_MACHINE (**needs Admin rights**) or Windows will not load the .dll. The shell extension overcomes an old Windows design issue where selecting files + directories at once would start two instances of 8-ZipFM.exe, one for files only, and one for directories only. But the user expects to put files + directories in one archive, and not two. ZipFM.exe tries to make the install process as painless as possible, will ask automatically for admin rights only when needed and doesn't need admin rights for normal use outside installing/deinstalling/update. Will ask again when user moved the program or extension dll. The windows registry wants absolute paths, so to keep the ZipFM.exe program portable we need to update registry values if necessary.

- **Install:** (green = important)
`8-ZipFM.exe --install    does    regsvr32.exe /s 8-ZipShellExtension.dll`
- **Uninstall:**
`8-ZipFM.exe --uninstall does    regsvr32.exe /u /s 8-ZipShellExtension.dll`
- **Kill-Explorer:**
`8-ZipFM.exe --kill        does    taskkill /IM explorer.exe /F (for 8-ZipShellExtension.dll development)`
- **Start-Explorer:**
`8-ZipFM.exe --start        does    start explorer.exe                    (for 8-ZipShellExtension.dll development)`

- 1.) Computer\HKEY_LOCAL_MACHINE\SOFTWARE\Classes\CLSID\{8A9EC69E-DFBA-4321-8E7D-6514968B4A5C}\InprocServer32
 (Default) REG_SZ C:\GitHub\dev2025_zstd_fltk\bin\win64_Release_static\8-ZipShellExtension.dll
 ThreadingModel REG_SZ Apartment
- 2.) Computer\HKEY_LOCAL_MACHINE\SOFTWARE\Classes*\shellex\ContextMenuHandlers\8-Zip
 (Default) REG_SZ {8A9EC69E-DFBA-4321-8E7D-6514968B4A5C}
- 3.) Computer\HKEY_LOCAL_MACHINE\SOFTWARE\Classes\Directory\shellex\ContextMenuHandlers\8-Zip
 (Default) REG_SZ {8A9EC69E-DFBA-4321-8E7D-6514968B4A5C}
- 4.) Computer\HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows\CurrentVersion\Shell Extensions\Approved
 {8A9EC69E-DFBA-4321-8E7D-6514968B4A5C} REG_SZ 8-Zip Shell Extension
- 5.) Computer\HKEY_LOCAL_MACHINE\SOFTWARE\8-Zip
 Path REG_SZ C:\GitHub\dev2025_zstd_fltk\bin\win64_Release_static\8-ZipFM.exe
 Path64 REG_SZ C:\GitHub\dev2025_zstd_fltk\bin\win64_Release_static\8-ZipFM.exe

Not sure yet if (5.) is necessary. (1.) Is already worst case with fix absolute path, making 8-Zip program less portable. When 8-ZipFM.exe is moved and started it must check registry and update with new path, needing admin rights again.
